(Notes) 1. Figures in the exhibits are calculated using the plural statistics documents which Trust Companies Association of Japan made and breakdown every classification according to the function.
 In addition, Primary trusts are placed in the breakdown every classification according to the function.
 2. Asset Management Type Trust : The trust that a trustee(trust banks) manages assets by own discretion.
 3. Loan trusts have been included in the data since the end of March 2009.
 4. Asset Administration Type Trust : The trust that a trustee manages the assets based on the directions.
 5. Asset Securitization Type Trust : The trust for planning the securitization of assets, and an originator financing.
 6. Fields "Others" in "Asset Management Type Trust" and "Asset Administration Type Trust" have been provided for data from the end of March 2009.
 Some items that did not previously fit into the three functional classifications and were included in "Other Property Trusts" have been reallocated according to function.
 These are "diversified trusts" that simultaneously incorporate multiple asset types such as cash and securities.

(*△ means decrease)
